EVIDENCE UPDATE

HIGH QUALITY HEALTHCARE EVIDENCE IS NEEDED NOW MORE THAN EVER

The [Health Service Journal](#): the leading source of healthcare news and commentary in the UK is now available to anyone with a merseycare.nhs.uk email address.

This initiative supported by the [Centre for Perfect Care](#) is a major breakthrough for Mersey Care – for the very first time everyone in the organisation regardless of location or job role now has equal access to the latest healthcare news and opinion.

FOR HEALTHCARE LEADERS

HSJ

Access is available to everyone via PC or app – simply register using your merseycare.nhs.uk email address.

Coming Soon

Our most requested journal ever, the [American Journal of Psychiatry](#) returns to Mersey Care after an extended break. Access through OpenAthens via [YourEvidence](#), [HDAS](#) or the [AJP website](#) from January.

What would you recommend?

You can access over 12,000 different journal titles across all health specialties through your Mersey Care OpenAthens account and we'd love to know if there are any titles we are missing. We'll always take your opinions and requests into consideration and "cost permitting" try to make them available to the whole organisation.

[So please drop us an email and let us know what new titles you'd like to see in 2021.](#)

The Evidence Team can still be contacted via email and are still more than happy to carry out evidence reviews to help with your clinical or corporate change program

Any books that you have on loan from us are now due back Spring 2021
